

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 8380

This table lists the maximum allowable emission rates for all sources of air contaminants covered by this permit.

### AIR CONTAMINANTS DATA

| Emission<br>Point No. (1) | Source<br>Name (2) | Air Contaminant<br>Name (3) | <u>Emission Rates</u> |            |
|---------------------------|--------------------|-----------------------------|-----------------------|------------|
|                           |                    |                             | <u>lb/hr</u>          | <u>TPY</u> |
| FM1-3                     | Foam Machine Vents | MeCl                        | 941.7*                | 23.0**     |
|                           |                    | VOC                         | <0.1                  | 0.09       |
| BR1-2                     | Bun Storage Vents  | MeCl                        | 941.7*                | 23.0**     |
| TDI-1                     | Bulk Tank          | VOC                         | <0.1                  | 0.12       |
| TDI-2                     | Bulk Tank          | VOC                         | <0.1                  | 0.06       |

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources use area name or fugitive source name.

(3) MeCl - methylene chloride

VOC - volatile organic ompounds as defined in 30 Texas Administrative Code Section 101.1

\* Total plant emissions of MECl will not exceed 941.7 pounds per hour as determined by Special Condition No. 6

\*\* Total plant emissions of MECl will not exceed 23 tons per year.

Dated February 7, 2001
