

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 7336B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in General Rule 101.1
 PM - particulate matter, suspended in the atmosphere, including PM₁₀.
 SO₂ - sulfur dioxide
 CO - carbon monoxide
 NO_x - nitrogen oxides
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Diesel engines for fire fighting equipment may be operated up to

three hours per week. Operation beyond that requires notification in accordance with Section 101.6 of the Texas Natural Resource Conservation Commission general rules.
