

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 21130

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
 - (2) Specific point source name. For fugitive sources use area name or fugitive source name.
 - (3) SO₂ - sulfur dioxide
H₂SO₄ - sulfuric acid
NO_x - total oxides of nitrogen
H₂S - hydrogen sulfide
- * Except as specified above, emission rates are based on and the facilities are limited by the following maximum operating schedule: Hrs/year 8,760
- ** Compliance with annual emission limits is based on a rolling 12-month period.
