

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 31156

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀.
PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
- (4) Fugitive emissions.
- (5) Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year
- (6) Emission rates are based on and the facilities (Block Plant) are limited to a maximum hourly production rate of 13.5 cubic yards and a maximum annual production rate of 107,748 cubic yards.
- (7) Emission rates are based on and the facilities (Paver Plant) are limited to a maximum hourly production rate of 65 cubic yards and a maximum annual production rate of 285,576 cubic yards.
