

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 19127

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.
- | | |
|------------------|---|
| VOC | - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1(116) [30 TAC § 101.1(116)]. |
| NO _x | - total oxides of nitrogen |
| SO ₂ | - sulfur dioxide, which includes all sulfur species related to fuel combustion. |
| PM | - particulate matter, as defined in 30 TAC § 101.1(79). |
| PM ₁₀ | - particulate matter equal to or less than 10 microns in diameter as defined in 30 TAC § 101.1(79). |
| CO | - carbon monoxide |
| TOC | - total organic compounds of products of combustion. |
- (4) Kerosene storage vessels remain authorized by Permit by Rule (PBR) 30 TAC § 106.472, incorporated here by reference. Compliance with the emissions from the storage tanks shall be determined based on the PBR, the limits listed in the maximum allowable emission rates table (MAERT) are for information only and do not constitute an additional limit on the source.
- (5) Propane storage vessels remain authorized by PBR 30 TAC § 106.476, incorporated here by reference. Compliance with the emissions from the storage tanks shall be determined based on the PBR, the limits listed in the MAERT are for information only and do not constitute an additional limit on the source.

** Compliance with annual emission limits is based on a rolling 12-month period.
