

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Flexible Permit Number 73383

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
VENT252	Tank 252	VOC		
VENT253	Tank 253	VOC		
VENT256	Tank 256	VOC		
VENT323	Tank 323	VOC		
VENT326	Tank 326	VOC		
VENT331	Tank 331	VOC		
	Emission Cap	VOC HAP (5)	24.15	16.61
FUG	Fugitive Sources (4)	VOC	0.03	0.11

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1  
HAP - hazardous air pollutant emissions are included in the VOC emissions and consist of 2,2,4 - trimethylpentane, benzene, ethylbenzene, hexane, toluene, and xylene.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) The combined emissions of all sources of HAPs at this site is limited to less than 10 tons per year (tpy) of any single HAP and less than 25 tpy of any combination of aggregate HAPs. Records of speciated HAP emissions will be maintained on-site to confirm that this requirement is being met on a rolling 12-month basis.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8,760 Hrs/year

\*\* Compliance with annual emission limits is based on a rolling 12-month period.

Dated April 30, 2010
