

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 53849

This table lists the maximum allowable emission rates of all emissions of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for this permit and are the maximum rates authorized by this permit from these emission points. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1

NO<sub>x</sub> - total oxides of nitrogen

CO - carbon monoxide

(4) Piping component fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
