

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 45417

This table lists the maximum allowable emission rates and one of the five sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	<u>Emission Rates</u>	
			lb/hr	TPY*
MT-S8	Boiler No. 8	NO <sub>x</sub>	---	58.1

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) NO<sub>x</sub> - total oxides of nitrogen

\* Compliance with annual emission limits is based on a rolling 12-month period and is to be determined on the beginning of each month by multiplying the annual arithmetic average controlled emission rate (NO<sub>x</sub> lb/MMBtu) by the annual total heat input (MMBtu) over the prior 12-month period. **(1/10)**
