

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 24247

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(4) Emission rate is based on a one hour average in accordance with the monitoring and testing provisions of this permit.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

__Hrs/day __Days/week __Weeks/year or 8,760 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.

*** The NO_x emission rate of 5 lbs/hr is applicable at all times unless the urea injection system is down for maintenance activities.
