

# EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

19284

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY

		PM	0.1	<1
F-01 (5)	Fugitive	VOC		4

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter  
VOC - volatile organic compounds as defined in General Rule 101.1  
NOx - total oxides of nitrogen  
CO - carbon monoxide
- (4) The 180HP Minneapolis Moline Engine has not demonstrated compliance by testing and shall not be operated until compliance is demonstrated by testing. Emissions shown above for this engine are estimates and will be changed to reflect actual emissions as measured during testing.
- (5) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

\* Emission rates are based on and the facilities are limited by the following maximum operating
