

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 20807

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO_x - total oxides of nitrogen

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

SO ₂	- sulfur dioxide
PM	- particulate matter, suspended in the atmosphere, including PM ₁₀
PM ₁₀	- particulate matter equal to or less than 10 microns in diameter
CO	- carbon monoxide
H ₂ S	- hydrogen sulfide
HCl	- hydrogen chloride
HAP	- any air contaminant (pollutant) listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of Federal Regulations Part 63, Subpart C

- (4) Fugitive emissions are an estimate.
- (5) Hazardous air pollutant (HAP) emissions are included in the PM and VOC allowable emission rates and the speciated values are reflected on the Table 1(a)s submitted with the permit amendment application. When a HAP compound hourly emission rate exceeded 0.04 pound per hour, the compound and its emission rate were listed on the maximum allowable emission rates table; however, the HAP compound emissions are also included in the PM and VOC emission rates.
- (6) Included in PM and VOC emission rates.
- (7) Emission rates are the sum of the emission for all the listed emission points.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

** Maximum allowable hourly and annual throughputs of oxidized, unoxidized, and treated asphalt are shown in the confidential section of the Amendment Application dated August 1999 with revisions dated December 22, 1999.
