

# Emission Sources - Maximum Allowable Emission Rates

Permit Number 17976

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lbs/hour	TPY (4)
MAIN BLDG	Main Building Exhaust Source Group	VOC	43.46	9.50
		Exempt Solvent	14.89	15.49
		PM	0.30	0.27
		Individual HAPs	--.--	<9.00
		Total HAPs	--.--	<24.00

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.
  - VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
  - PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented
  - HAP - hazardous air pollutant as listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of Federal Regulations Part 63, Subpart C
- (4) See Special Condition No. 8G & 12B
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Location of representative Worst-Case Stack (Emission Point No. A7) having a unit impact factor of 288.1 µg/m<sup>3</sup> per lb/hr established through dispersion modeling. Air contaminants will be emitted from any of 49 stacks located throughout the site. Detailed stack parameters are shown in the Overall Table included in Figure VIII.B (Plot Plan) of the permit renewal application dated December 15, 2004.
