

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 80289, PSDTX1082, PAL9

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

| Emission Point No. (1) | Source Name (2) | Air Contaminant Name (3) | Emission Rates | |
|---------------------------|-------------------------------------|----------------------------------------|----------------|---------|
| | | | lbs/hour | TPY (4) |
| CBY41 | Combustion Turbine 41 | NO _x (6) | 28 | 93 |

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO_x - total oxides of nitrogen
- SO₂ - sulfur dioxide
- PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}, as represented

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

| | |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| PM ₁₀ | - total particulate matter equal to or less than 10 microns in diameter, including PM _{2.5} , as represented |
| CO | - carbon monoxide |
| H ₂ SO ₄ | - sulfuric acid |
| NH ₃ | - ammonia |
| H ₂ CO | - formaldehyde |
| MSS | - maintenance, startup and shutdown |

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) MSS lb/hr limits apply only during each clock hour that includes one or more minutes of MSS activities. During all other clock hours, the normal lb/hr limits apply.
- (7) The formaldehyde emission limits and initial demonstration of compliance become effective upon the EPA either lifting the stay that applies to lean premix gas-fired turbines and diffusion flame gas-fired turbines or taking final action declining to remove these subcategories from the source category list.
