

# EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 5160

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) TSP - total suspended particulate including PM<sub>10</sub>  
PM<sub>10</sub> - particulate matter less than 10 microns in diameter

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

\* Refer to Special Condition No. 1 for throughput limitations and basis of emission rates.

- (a) Emissions from these sources will not be emitted simultaneously as a common elevator leg serves both operations.
- (b) Emissions from these sources will not be emitted simultaneously as a common elevator leg serves all of these operations.
