

Emission Sources - Maximum Allowable Emission Rates

Permit Number 18553

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification.

(2) Specific point source name.

(3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

Emission Sources - Maximum Allowable Emission Rates

- (4) Total annual VOC emission from this plant shall not exceed 199.20 tons per rolling 12 consecutive months. Individual source annual emissions shall not exceed the amount listed.
- (5) Total combined annual VOC emission from these EPNs shall not exceed 159.60 tons per rolling 12 consecutive months. These EPNs remain subject to the plant-wide limitation in Note 4.
