

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 56698

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
EV4	V004 Scrubber	VOC (5)	0.54	0.14
		Ethylene Oxide	0.29	0.07
		Propylene Oxide	0.20	0.05
R200D	R-200 Knock Out Pot	VOC (5)	9.94	7.17
		Naphthalene	0.80	0.46
FUGR1,200B	R-200 Fugitives (4)	VOC	0.25	1.11
LOAD330	Loading Area (Department 330)	VOC (5)	6.30	0.31
		Naphthalene	0.51	0.02

[As you requested. Please supply calculations supporting your proposed Naphthalene emissions increase. I have not seen them in the application]

- (1) Emission point identification - either specific equipment designation or emission point number (EPN) from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) For each EPN the VOC emission rates include any compounds which may appear below.
- (6) ~~The emission rates on this table become effective on March 1, 2007. [Statement is now redundant.]~~

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52.3 or Hrs/year _____

** Compliance with annual emission limits is based on a rolling 12-month period.
