

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 19716

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code § 101.1.

PM - particulate matter, suspended in the atmosphere, including PM₁₀.

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall

be assumed that no particulate matter greater than 10 microns is emitted.

HAP - hazardous air pollutant as defined in Title 40 Code of Federal Regulations, Part 63, Subpart C.

(4) The emission rate of any one hazardous air pollutant is limited to less than 10 tons per year (TPY).

(5) The total emission rate of all hazardous air pollutants is limited to less than 25 TPY.
