

Emission Sources - Maximum Allowable Emission Rates

Permit Number 71577L001

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}, as represented

PM₁₀ - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}, as represented

(4) Fugitive emissions are an estimate only.

(5) Includes loading and unloading operations at both wet screen and dry screen processes.

(6) Includes Hopper Emissions (EPNs 1 and 7) and conveyor drop points at both wet screen and dry screen processes.

(7) Includes total stockpile area at wet screen and dry screen operations.

(8) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:
