

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 45606

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by the Voluntary Emissions Reduction Permit portion of this permit. Boilers B-1, B-2 and B-3 are covered by the Electric Generating Facility Permit portion of this permit and are not required to be on this table. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 PM - particulate matter suspended in the atmosphere, including PM₁₀.
 PM₁₀ - particulate matter equal to or less than 10 microns in diameter.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

emission rate.

- * Emission rates are based on and the facilities are limited by the following maximum operating schedules:

_____Hrs/day ____Days/week ____Weeks/year or 8,400 Hrs/year (Cooling Towers 1 & 2)

_____Hrs/day ____Days/week ____Weeks/year or 8,600 Hrs/year (Cooling Tower 3)

- ** Compliance with annual emission limits is based on a rolling 12-month period.
