

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

23344

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

| Emission<br>Point No. (1) | Source                 |          | Air Contaminant |                 | <u>Emission Rates *</u> |      |
|---------------------------|------------------------|----------|-----------------|-----------------|-------------------------|------|
|                           | Name (2)               | Name (3) | lb/hr           | TPY             |                         |      |
| 4-44                      | Former No. 11 Baghouse |          |                 | PM              | 0.45                    | 2.00 |
|                           |                        |          |                 | NO <sub>x</sub> | 1.30                    | 5.70 |
|                           |                        |          |                 | SO <sub>x</sub> | <0.01                   | 0.01 |
|                           |                        |          |                 | CO              | 0.19                    | 0.80 |

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter  
 NO<sub>x</sub> - total oxides of nitrogen  
 SO<sub>x</sub> - total oxides of sulfur  
 CO - carbon monoxide

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760
