

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## AIR CONTAMINANTS DATA

Emission	Source	Air Contaminant	<u>Emission Rates *</u>	
Point No. (1)	Name (2)	Name (3)	lb/hr	TPY**

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit Numbers 5064 and N001

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code §101.1
  - NO<sub>x</sub> - total oxides of nitrogen
  - CO - carbon monoxide
  - SO<sub>2</sub> - sulfur dioxide
  - PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub>
  - PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
- HCl - hydrogen chloride
- Cl<sub>2</sub> - chlorine
- As - arsenic
- Ag - silver
- Ba - barium
- Be - beryllium
- Cd - cadmium
- Cr - chromium
- Hg - mercury
- Ni - nickel
- NH<sub>3</sub> - ammonia
- Pb - lead
- Sb - antimony
- Tl - thallium
- PCB - polychlorinated biphenyls
- PM<sub>30</sub> - particulate matter equal to or less than 30 microns in diameter

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (4) Allowables for Incinerator Trains I and II until September 29, 2004.
  - (5) Clean Harbors Deer Park, L.P., is also subject to the Mass Emissions Cap and Trade Program as outlined in 30 TAC § 101.351. The Mass Cap and Trade Program limits annual NO<sub>x</sub> emissions to a prescribed schedule of allowances, which are lower than the existing permit allowables.
  - (6) Emission rate is limited to testing of particulate emissions while varying the pressure drop across the Calvert collision scrubbers as described in the Calvert Test Plan submitted August 14, 2000.
- 
- (7) No later than September 30, 2004, a wet electrostatic precipitator system shall be operational on each of the incinerator trains and no later than March 31, 2007, a Selective Catalytic Reduction De-NO<sub>x</sub> system shall be operational on each of the incinerator trains resulting in these allowables. In addition, each of the two incinerator trains will have a separate stack.
- 
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
    - Engines at 50 hours per year total.
    - Pumps at 50 hours per year each.
    - All emission rates are based on continuous operation.
- 
- \*\* Compliance with annual emission limits is based on a rolling 12-month period. The annual emission limit for EPN E-4 is based on the calendar year. Emissions of air contaminants from EPN E-4 are permitted under NA and State.
