

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 19190

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name.

(3) VOC - volatile organic compounds as defined in General Rule 101.1.

Cl/F - inorganic chlorinated and fluorinated compounds such as hydrochloric acid and hydrofluoric acid.

Misc - inorganic acids and bases, non-chlorinated/non-fluorinated compounds, and inert gases.

(4) These emission rates are the sum of both scrubber exhausts.

* These allowable emission rates do not represent the potential increases allowed under Special Condition No. 4.
