

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

4437A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit amendment and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter
NOx - total oxides of nitrogen
VOC - volatile organic compounds as defined in General Rule 101.1
CO - carbon monoxide
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Emissions are those attributable to these facilities. The boilers' total emissions are listed separately in Permit No. 20384 and do not exceed allowable emission rates with the contribution from these facilities.
- (6) Shall be in service not later than March 31, 1995.
- (7) Shall be removed from service not later than March 31, 1995.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day____Days/week____Weeks/year____or Hrs/year 8,760
