

Emission Sources - Maximum Allowable Emission Rates

Permit Number 56470

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) CO - carbon monoxide
NO_x - total oxides of nitrogen
SO₂ - sulfur dioxide
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) LOADFUG represents the authorized uncontrolled loading of low vapor pressure products.
- (7) The VOC rates include the benzene emission rates which follow.
- (8) These emission rates cease to apply if this tank is modified as represented in the amendment application, Form PI-1 dated November 11, 2011.
- (9) These emission rates, together with the associated service, fill/withdrawal rate, and throughput, become authorized if this tank is modified as represented in the amendment application, Form PI-1 dated November 11, 2011.
