(1) Emission point identification from Table 1(a) dated November 2, 2000.

(2) Specific point source names.

(3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 PM - particulate matter, suspended in the atmosphere, including particulate matter equal to or less than 10 microns in diameter.
 HAP - any air contaminant (pollutant) listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of Federal Regulations (40 CFR) Part 63, Subpart C

(4) Compliance with annual emission limits is based on a rolling 12-month period.

(5) These HAP limits are being included so that a Title V permit is not required, but due to EPA's once-in, always-in policy the requirements of 40 CFR Part 63, Subpart GG (Aerospace Manufacturing and Rework Facilities) remain applicable because the September 1, 1998, final compliance date passed without inclusion of an enforceable HAP limit in the permit.
