

EMISSION SOURCES - EMISSION CAPS AND RATES

Permit No. 292

This table lists the maximum allowable emission caps or rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

emitted.

VOC - volatile organic compounds as defined in General Rule 101.1 and measured as hexane.

- (4) VOC emissions for these sources are included in the Emissions Cap.
- (5) Additional VOC emissions from the flare related to pump maintenance activities; excluded from the Emissions Cap.
- (6) Emission Cap prior to June 30, 1999 is before installation of Regenerative Thermal Oxidizer (E-RGT0)
- (7) Emission Cap from June 30, 1999 through 12/31/2000 is based on installation of the RGT0 without the emissions from the spiral conveyors being routed to the RGT0 for control.
- (8) Emission Cap from 1/31/2001 through 6/30/2001 is based on the emissions from one spiral conveyor being routed to the RGT0 for control.
- (9) Emission Cap after June 30, 2001 is based on the emissions from both spiral conveyors being routed to the RGT0 for control.
- (10) The common stack for all Drum Dryer Hood Vents (EPN E-DHV) will be routed to the RGT0 for control not later than June 30, 1999.
