

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 44086

This table lists the maximum allowable emission rates of all emissions of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for this permit and are the maximum rates authorized by this permit from these emission points. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO<sub>x</sub> - total oxides of nitrogen
- CO - carbon monoxide
- SO<sub>2</sub> - sulfur dioxide

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(4) Piping component fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

\* Emission rates are based on operating 8,760 hours per year.

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
