

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 70904

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	<u>Emission Rates</u>	
			<u>lb/hr</u>	<u>TPY*</u>
1	Process Area	Styrene	6.62	6.99
		Methyl methacrylate	1.13	1.13
2	Mixing Area	PM ₁₀	0.01	0.01
3	Facility	Exempt Solvents	6.64	4.98

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names.

(3) Exempt Solvents - those carbon compounds or mixtures of carbon compounds are used as solvents which have been excluded from the definition of volatile organic compounds.

PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter.

* Compliance with annual emission limits is based on a rolling 12-month period.
