

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 4351

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATE

- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) NH₃ - ammonia
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
NO_x - total oxides of nitrogen
PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
CO - carbon monoxide
SO₂ - sulfur dioxide
H₂S - hydrogen sulfide
H₂SO₄ - hydrogen sulfate
NO - nitrogen oxide
N₂O - nitrous oxide
CH₄ - methane
- (4) Emission rate is an estimate and is enforceable though compliance with the applicable special condition(s) and permit application representations.
- (5) The VOC emission estimates do not include emissions of VOC which are specifically identified by chemical name.
- (6) From activities specified in Special Condition No. 19 of this permit.
- (7) Annual VOC, NO_x and SO₂ emissions from ANI-STK83MSS are included in the annual emissions from ANI-STK83.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:
____Hrs/day ____Days/week ____Weeks/year or 8,760 Hrs/year
- ** Compliance with annual emission limits is based on a rolling 12-month period.

Dated December 27, 2010
