

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 17299

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate
PM₁₀ - particulate matter less than 10 microns

* For Emission Point Nos. 1-2 and 2-2, emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or
Hrs/year 8,760

All other emission points are operated on an as-needed basis, but not to exceed their annual emissions limits.
