

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 83161

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
Bldg	Material Handling (4)(5)	PM	0.01	<0.01
Stack 1	Compounder Stack	VOC	5.14	2.26
		PM	<0.01	<0.01
Bldg	Compounding Fugitives (4)	VOC	0.27	0.12
		PM	<0.01	<0.01
Bldg	Compression Molding (4)	VOC	<0.01	<0.01
		PM	<0.01	<0.01

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub>

(4) Fugitive emissions are an estimate only.

(5) Material Handling includes grinding, cracking, tumbling, shaking, mixing, sanding and material transfers.

\* Emission rates are based on and the facilities are limited by the following maximum throughput and operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

Maximum Total Facility: 126 pounds/hour and 111,000 pounds/year

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

\*\* Compliance with annual emission limits is based on a rolling 12-month period.

Dated July 1, 2008
