

Emission Sources - Maximum Allowable Emission Rates

Permit Number 1

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates (9)	
			lbs/hour	TPY (4)
5-6S	Cement Railcar Gathering Screw Conveyor 1, 2, and 3 Baghouse	PM	0.09	0.38
		PM ₁₀	0.09	0.38
		PM _{2.5}	0.03	0.13
1-2A	Quarry Belt No. 5 Baghouse	PM	0.26	1.13
		PM ₁₀	0.26	1.13
		PM _{2.5}	0.09	0.38
1-2B	Quarry Belt No. 4 Baghouse	PM	0.26	1.13
		PM ₁₀	0.26	1.13

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
NO_x - total oxides of nitrogen
SO₂ - sulfur dioxide
PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}, as represented
PM₁₀ - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}, as represented
PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter
CO - carbon monoxide
NH₃ - ammonia
H₂SO₄ - sulfuric acid
Pb - lead
Hg - mercury
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) The hourly Hg emission rates apply based on the 30-operating day rolling average hourly emission rate.
- (7) The hourly NH₃ emission rate is applicable as a 24-hour rolling average.

Emission Sources - Maximum Allowable Emission Rates

- (8) The hourly VOC emission rates apply based on the 12-month rolling average hourly emission rate.
- (9) Planned maintenance, startup, and shutdown (MSS) emissions are included.

Date: May 8, 2023
