

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 25738/PSD-TX-840

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) NO_x - total oxides of nitrogen
CO - carbon monoxide
SO₂ - sulfur dioxide
VOC - volatile organic compounds as defined in General Rule 101.1
PM₁₀ - particulate matter less than 10 microns in diameter
H₂SO₄ - sulfuric acid mist
- (4) Except for VOC, long-term limits for EPN 5 based on 720 hours/year of turbine only firing with fuel oil and 8,040 hours/year combined cycle firing with natural gas. Long-term VOC limits for EPN 5 based on 8,760 hours/year of combined cycle firing with natural gas.
