

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 79771

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
F1	Rear Dust Collector	PM	0.01	0.01
		PM ₁₀	0.01	0.01
F2	Front Dust Collector	PM	0.03	0.04
		PM ₁₀	0.02	0.03
FUG	Fugitives (4)	PM	0.47	0.66
		PM ₁₀	0.27	0.38

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter

(4) Fugitive emissions are an estimate only.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

9 Hrs/day 6 Days/week 52 Weeks/year or 2,808 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.

Total lumber throughput (all saws): 86,000 bd-ft/dy 30,186,000 bd-ft/yr
