

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number: 48010

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lb/hr	TPY*
EPN's 1 and 2	Painting, Abrasive Blasting, Welding (Docks)	VOC	59.36	24.53
		PM ₁₀ (4)	2.56	0.42
		ES	11.52	1.90
EPN 3	Painting, Abrasive Blasting (Pit)	VOC	59.36	6.13
		PM ₁₀	0.55	0.11
		ES	11.52	0.48
Site-Wide	Welding	PM ₁₀	2.56	5.30

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code (TAC) Section 101.1

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall

be assumed that no particulate matter greater than 10 microns is emitted.

ES - exempt solvents as defined in 30 TAC 101.1.

(4) Annual PM₁₀ emissions listed for EPN's 1 and 2 are a result of painting and blasting only at the docks. Welding may be conducted throughout the plant, including the docks, for which a specific site-wide welding emissions cap is listed.

* Compliance with annual emission limits is based on a rolling 12-month period.
