

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 22331

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

area name or fugitive source name.

- (3) VOC - volatile organic compounds as defined in General Rule 101.1
NO_x - total oxides of nitrogen
CO - carbon monoxide

(4) Fugitive emissions are an estimates only and should not be considered as a maximum allowable emission rate.

(5) Labels in parenthesis following EPN identify the exemption number which applies to the facility, if any, and indicate that the facility did not undergo new source review.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
