

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 87235

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
1	Reclamation Tank Baghouse Stack	PM	0.02	<0.01
		PM <sub>10</sub>	0.02	<0.01
2	Sand Silo Baghouse Stack	PM	<0.01	<0.01
		PM <sub>10</sub>	<0.01	<0.01

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.

PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>  
 PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter  
 PM<sub>2.5</sub> - particulate matter equal to or less than 2.5 microns in diameter

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule and throughput limits:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

Sand: 105 tons/hour; 20,000 tons/year

Cement: 60 tons/hour; 30,000 tons/year

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
