

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 76278

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	AIR CONTAMINANTS DATA	
			<u>Emission Rates *</u>	
			lb/hr	TPY**
1	Silo	PM <sub>10</sub>	0.03	0.04
4	Mixer (4)	PM	0.0012	0.0004
		PM <sub>10</sub>	0.0005	0.0002
5	Drop Point Emissions (4)	PM	0.04	0.05
		PM <sub>10</sub>	0.02	0.02
6	Truck Loading Fugitives (4)	PM <sub>10</sub>	0.02	0.02
7	Stockpiles (4)	PM	---	0.06
		PM <sub>10</sub>	---	0.03

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) PM - total suspended particulate matter including PM<sub>10</sub>

PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

(4) Fugitive emissions are an estimate only.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Maximum hourly production of 4 cubic yards per hour of ready mix concrete and maximum yearly production of 10,400 cubic yards per year of ready mix concrete.

Hrs/day 10 Days/week 6 Weeks/year 52 or Hrs/year 2,600

Dated January 31, 2006
