

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 17976

This table lists the maximum allowable emission rates consolidated for all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for the combined sources.

AIR CONTAMINANTS DATA

** Site Wide Exhaust Source Group - consist of all emission points modeled for the February/March permit amendment application. It also contains points added and authorized by Special Condition No. 5. The impacts for this maximum allowable emission rates table are based on EPN D3 having the greatest unit impact. If changes authorized by Special Condition No. 5 result in impacts greater than those of D3, this note shall be modified to reflect the new "worst-case" point at the time of permit alteration.
