

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 19074

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM₁₀ - particulate matter equal to or less than 10 microns
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
NO_x - total oxides of nitrogen
CO - carbon monoxide
IOC - inorganic compounds, unspiciated
- (4) The allowable emission rates listed for individual VOC species from this EPN are included in the total VOC emission rates.
- (5) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (6) This source includes Water Bath Nos. 1 through 4. Water Bath No. 9 may be routed to this scrubber.
- (7) This source includes Water Bath Nos. 5 through 8. Water Bath No. 9 may be routed to this scrubber.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day _____ Days/week _____ Weeks/year _____ or Hrs/year 8,760

** Compliance with annual emission limits is based on a rolling 12-month period.
