

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number T-19298

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY
1	Silo No. 1 Baghouse	PM ₁₀	<0.01	<0.01
2	Silo No. 2 Baghouse	PM ₁₀	<0.01	<0.01
3	Central Baghouse (weigh hopper, mixer, and fill areas)	PM ₁₀	0.86	1.34

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

* Emission rates for each baghouse are based on and the facilities are limited to an outlet grain loading of 0.01 grain per dry standard cubic feet and 3,120 hours per year.

This facility is limited to a maximum annual throughput of 15,500 total tons of cement, limestone and sand.
