

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 7780

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources area name or fugitive source name used.

(3) VOC - volatile organic compounds as defined in General Rule 101.1

(a) from standard mix asphalt concrete

(b) from emulsified cold mix asphalt concrete

NO_x - total oxides of nitrogen

CO - carbon monoxide

SO₂ - sulfur dioxide

PM₁₀ - particulate matter less than 10 microns in diameter

TSP - total suspended particulate matter

(4) Fugitive emissions are an estimate only.
