

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 22110

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) This EPN represents emissions from the grandfathered wastewater collection system which are attributable to the Isoprene Unit. The Isoprene Unit discharges 28.14 tpy VOC and 8.90 tpy acetone into the wastewater collection system.
- (6) The emission rate is effective during the period of April 28, 2004 to July 1, 2004.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

** Compliance with annual emission limits is based on a rolling 12-month period.
