

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 20564

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES				
Temp1-Temp2	(4)(5)	PM ₁₀	1.0	0.3

- (1) Emission point identification - either specific equipment designation emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP - total suspended particulate matter (includes PM₁₀)
PM₁₀ - particulate matter less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) The emission points Temp1-Temp2, reflect a temporary conveyor system permitted for use until the Port of Beaumont completes construction on a new dock. Authorization for the use of this temporary conveyor system will expire six months from the date of dock completion.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52

Annual plant throughput of hardwood chips shall not exceed 1,000,000 tons and the annual throughput of all other materials shall not exceed 480,000 tons. Emission rates are based on and the facilities are limited by the following maximum throughput rates:

<u>Materials</u>	Inbound	Outbound	
	<u>tons/hour</u>	<u>tons/hour</u>	<u>tons/year</u>
hardwood chips	800	2,000	1,000,000
washed aggregate	4,000	1,200	480,000
washed sand and washed gravel	4,000	1,200	360,000
crushed limestone	4,000	1,200	360,000
