

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 17684

This table lists the maximum allowable emission rates and all sources of air contaminants covered by this permit **after** the catalytic oxidizer (EPN 6) is shutdown and emissions routed to the regenerative thermal oxidizer (EPN 20). The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.
