

Emission Sources - Maximum Allowable Emission Rates

Permit Number 31811

This table lists the maximum allowable emission rates and all sources of air contaminants covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1-
Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound
Inorganics - non-organic compounds
NO_x - total oxides of nitrogen
PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}
PM₁₀ - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}
PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter
CO - carbon monoxide
SO₂ - sulfur dioxide
HAP - hazardous air pollutant as listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of Federal Regulations Part 63, Subpart C
- (4) Rate is for a rolling 12 consecutive months.
- (5) Site-wide totals include products of combustion from Boilers (EPNs B-1 through 6); Concentrators/Oxidizers (EPNs TO-1 through 4); and Generators (EPNs GEN-1 through 12). Emission rates listed in this maximum allowable emission rates table from EPNs B-1 through 6, EPNs TO-1 through 4, and EPNs GEN-1 through 12 shall not be summed to determine total site-wide allowable emission rates for EPN All Stacks.
- (6) Individual and Combined HAP emission limits are site-wide caps and include all sources, whether specifically covered under this permit or through other authorizations (i.e., permit by rule, etc.).
- (7) Planned maintenance, startup, and shutdown (MSS) for the rotary concentrator/thermal oxidizers and the scrubbers were reviewed for the October 2010 permit amendment and MSS emissions are included in allowable emission rates.
