

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

18389

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
 - (2) Specific point source name. For fugitive sources use area name or fugitive source name.
 - (3) VOC - volatile organic compounds as defined in General Rule 101.1
PM - particulate matter
VOC1 - VOC contained in the blowing agent with an Effects Screening Level (ESL) of no less than 18,000 micrograms per cubic meter on an annual basis as established in the ESL list dated June 22, 1992.
 - (4) Emissions are distributed as itemized below. A redistribution among individual emission points shall not be considered an exceedance of this table.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760
