

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 21644

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

CONTAMINANTS DATA			AIR	
Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY
E-1	Cartridge Filter	TSP	1.2e-5	5.3e-5
	Dust Collector	PM <sub>10</sub>	1.2e-5	5.3e-5

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) PM<sub>10</sub> - particulate matter less than 10 microns

TSP - total suspended particulate

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production limits:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

Based on a maximum annual throughput of metals as listed in Special Condition No. 1. Use of any other metallic compounds will require prior approval of the Executive Director of the Texas Natural Resource Conservation Commission.
