

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 6414

This table lists the maximum allowable emission rates. The total emissions of air contaminants from any of the sources listed in this table shall not exceed the values stated. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these sources.

AIR CONTAMINANTS DATA

Emission * Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lb/hr	TPY
E080-E084, E110-E113, 323.5	One Curing Oven	Nine Spray Booths and		VOC 86.4
E114-E116, E207		TSP	0.71	2.67

- (1) Emission point identification - emission point number from plot plan.
- (2) Specific point source name. The emissions from the nine spray booths are released through nine stacks connected to the spray booths and three roof vents. The electric curing oven emissions are released through one stack. The emission rates listed are for all nine spray booths and the curing oven combined.
- (3) VOC - volatile organic compounds as defined in General Rule 101.1
TSP - total suspended particulate matter

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 6 Days/week 52 Weeks/year or 7,488
Hrs/year
