

# Emission Sources - Maximum Allowable Emission Rates

Permit Numbers 160299 and PSDTX1576

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## Air Contaminants Data

| Emission Point No. (1) | Source Name (2)                         | Air Contaminant Name (3) | Emission Rates |         |
|------------------------|---|--------------------------|----------------|---------|
|                        |   |                          | lbs/hour       | TPY (4) |
| E-55-201               | Feed Treating Heater                    | NO <sub>x</sub>          | 2.35           | 5.41    |
|                        |   | NO <sub>x</sub> (MSS)    | 10.08          | (6)     |
|                        |   | CO                       | 4.63           | 7.49    |
|                        |   | CO (MSS)                 | 23.17          | (6)     |

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

Emission Sources - Maximum Allowable Emission Rates

- (3) VOC
  - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- NO<sub>x</sub>
  - total oxides of nitrogen
- SO<sub>2</sub>
  - sulfur dioxide
- PM
  - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented
- PM<sub>10</sub>
  - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented
- PM<sub>2.5</sub>
  - particulate matter equal to or less than 2.5 microns in diameter
- CO
  - carbon monoxide
- NH<sub>3</sub>
  - ammonia
- H<sub>2</sub>S
  - hydrogen sulfide
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Annual MSS emissions are included as part of annual emissions authorized for normal facility operation.

Date: September 16, 2020

# Emission Sources - Maximum Allowable Emission Rates

Permit Number GHGPSDTX200

This table lists the maximum allowable emission rates of greenhouse gas (GHG) emissions, as defined in Title 30 Texas Administrative Code § 101.1, for all sources of GHG air contaminants on the applicant's property that are authorized by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities authorized by this permit.

## Air Contaminants Data

| Emission Point No.<br>(1) | Source Name (2)      | Air Contaminant Name (3) | Emission Rates |         |
|---------------------------|----------------------|--------------------------|----------------|---------|
|                           |                      |                          | lbs/hour       | TPY (4) |

|                           |                      | CO <sub>2e</sub>         | -              | 21.00   |

Emission Sources - Maximum Allowable Emission Rates

|            |                     |                      |   |       |
|------------|---------------------|----------------------|---|-------|
| E-01-EMGEN | Emergency Generator | CO <sub>2</sub> (5)  | - | 47.00 |
|            |                     | CH <sub>4</sub> (5)  | - | <0.01 |
|            |                     | N <sub>2</sub> O (5) | - | <0.01 |
|            |                     | CO <sub>2e</sub>     | - | 47.00 |

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) CO<sub>2</sub> - carbon dioxide  
N<sub>2</sub>O - nitrous oxide  
CH<sub>4</sub> - methane  
CO<sub>2e</sub> - carbon dioxide equivalents based on the following Global Warming Potentials (GWP) found in Table A-1 of Subpart A 40 CFR Part 98 (78 FR 71904) for each pollutant: CO<sub>2</sub> (1), N<sub>2</sub>O (298), CH<sub>4</sub>(25)
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period. These rates include emissions from maintenance, startup, and shutdown.
- (5) Emission rate is given for informational purposes only and does not constitute enforceable limit.
